

AI CPT codes.

What exists.
What changes next.

Coding is not coverage.
Coverage is not payment.

Selected examples + ten emerging services
Sources checked September 12, 2026

A code is a starting point.

01 Coding

Does the service match the work and date?

02 Coverage

Does the payer cover this indication and setting?

03 Payment

Which rules and amount apply to this claim?

Established examples.

92229 Retinal imaging with automated analysis

75580 CT-derived coronary fractional flow reserve

75577 CT-based quantitative coronary plaque analysis

Selected Category I examples.
No universal coverage or payment implied.

2027 publication. October 2026 start.

The AMA revised the effective date for these ten Category III additions to **October 1, 2026**.
